## OBJECTIVE

Aspiring Data Analyst with a B.Tech background and strong knowledge of Python, SQL, and data visualization tools. Skilled in analyzing datasets, performing exploratory data analysis, and uncovering meaningful patterns to support data-driven business decisions.

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL

**Libraries:** NumPy, Pandas

**Web Development:** HTML, CSS, Bootstrap

**Developer Tools:** Excel, Google Colab, VS Code, Jupyter Notebook

## INTERNSHIPS

### Python & Data Analysis

- Gained hands-on experience in Python programming for data analysis and visualization.
- Learned and applied NumPy, Pandas, Matplotlib, and Seaborn to process and explore cricket datasets.
- Developed insights into player performance and match outcomes through exploratory data analysis.
- Built clear visualizations and dashboards to highlight batting, bowling, and team trends.
- Strengthened practical skills in data storytelling and project development.

## PROJECTS

### Student Management System

- Designed and implemented a menu-driven application with features like record creation, update, deletion, and tabular display.

### T20 Cricket Data Analysis

- Performed data cleaning and transformation on ball-by-ball T20 cricket datasets using Python.
- Utilized Pandas and NumPy to calculate batting averages, strike rates, and bowling economy.
- Created visualizations with Matplotlib and Seaborn to highlight team and player performance trends.
- Conducted exploratory analysis to identify match-winning factors and player consistency.
- Presented insights through graphs and dashboards, showcasing analytical and storytelling skills.
